

**METHOD, APPARATUS, AND COMPUTER-READABLE MEDIUM FOR  
DYNAMICALLY RENDERING A USER INTERFACE MENU**

**Abstract**

5           A method, apparatus, and computer-readable medium are provided for  
dynamically generating a user interface menu. According to the method, a menu  
definition file is stored that contains data describing one or more menu items to be  
displayed on the menu. A view definition file is stored separate from the menu definition  
file that contains data describing how the menu should appear when displayed. The  
10 contents of the view definition file and the menu definition file may be utilized together  
to dynamically display the menu.
